

Children's Employment Navigators

Employment Navigators work with youth ages 14 through graduation who are Board eligible through their path to employment. Employment Navigators can follow the individual through every step on this path.

How do we do this?

- * Identifying an individual's strengths and needs
- * Identifying individualized short and long term goals
- * Collaborating with schools and other programs to develop skills needed for successful employment
- * Working in collaboration with vendors to find employment
- * Identifying barriers to successful employment and assisting with resources to overcome these barriers
